Colorado State University Libraries WR304 Information

How to obtain temperature information from the NCDC Website You will be gathering the MMNT (monthly minimum temperature). You will also need MMXT (monthly maximum temp), TPCP (precipitation) and TSNW (snow) precipitation data.

NCDC Website—www.ncdc.noaa.gov

The NCDC site is available for free only on a computer with an .edu domain. You can access the site from any computer, but if the computer doesn't have an .edu domain, you will be prompted for payment.

Instructions:

On the homepage www.ncdc.noaa.gov choose: Weather/Climate Events, Information...

On the Weather/ Climate Resources page, on the left bar select Data Access tools National Environmental Satellite, Data, and Information Service

At the Data Access Tools, select: climate and weather

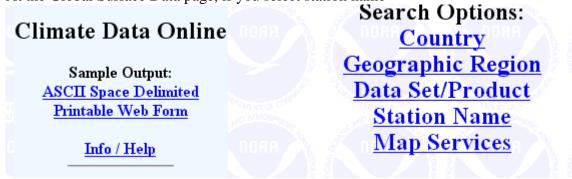

<u>DOC > NOAA > NESI</u>	DIS > <u>NCDC</u>	Keyword(s), City, Station Name
Current Events About NCDC NCDC Newsletter In the Spotlight What's New	D <u>Climate and Weather</u>	ata Access Tools
Data & Products Start Here	Satellite	
List Data & Products Free Data Data Access tools	RADAR	

From Climate and Weather page, select Global Surface Data

<u>Map Interface to</u> <u>Selected Online Data</u>	This GIS-based map interface provides access to US and global climate/weather data. The user selects the type of data required, and then uses a GIS interface to view the available stations, and select the stations of interest. This interface is gradually being upgraded to be more user-friendly and have additional features added.
<u>Select from Maps</u>	Over 2000 climate maps of the United States, including Alaska and Hawaii, are available in this system. These full color maps for climatic elements such as temperature, precipitation, snow, wind, pressure, etc., portray the climate of the U.S. The period of record of the data for most of the maps is 1961-1990. Most of the maps can be ordered in a high resolution Adobe PDF format, or as ESRI Shape Files.
<u>Global Surface Data</u>	Climate Data Online provides access to US and global climate/weather data, via a web interface. It also provides a map interface (GIS-based) for the data. Users may select data by region, country, state, climate division, county, and station, for any desired time period. A variety of formats are offered.

The Global Surface Data URL as of 2-06-2007 is: <u>http://hurricane.ncdc.noaa.gov/CDO/cdo</u>

At the Global Surface Data page, if you select station name

At station name search, type in the name of your town then click search for stations.

For this example, Fayetteville

FAYETTEVILLE/KELSO, TN UNITED STATES ISH ID: 72326399999	<u>DS3505 - Surface Data, Hourly Global</u> - 12/1988 to 11/1989
FAYETTEVILLE/SPRING, AR UNITED STATES ISH ID: 72343699999	DS3505 - Surface Data, Hourly Global - 02/2002 to 01/2006

COOP-WBAN ID: 403074-99999	<u>Surface Data, Annual Summary</u>

Usually you will have several lines to choose from. YOU WANT SURFACE DATA MONTHLY, click on the blue line for surface data monthly for the Fayetteville Exp Stn, AR.

Then instead of something useful, you SOMETIMES get this message. You don't get any help on what kind of problem there is with your dataset.

NNDC CLIMATE DATA ONLINE

A problem was encountered.

You must specify a valid dataset!

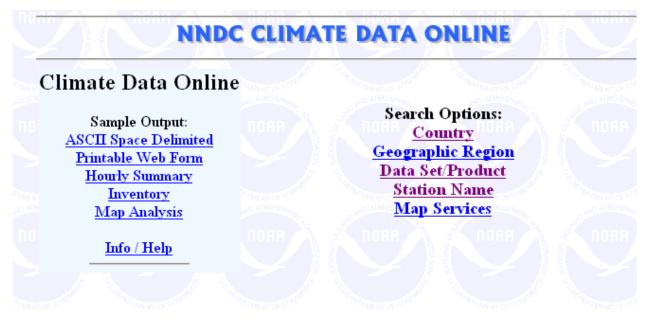

Hit your BACK button to try again

Privacy Policy	HOW ARE WE DOING? A user survey	FIRSTGOV	Disclaimer
	and the second se		

.

It looks like SOME OF THE TIME the TD3220 surface data monthly data are causing problems. If this happens, instead of selecting station name, select country.

Select country

Select United States (or another country for your international city) This example will follow a United States city example

Climate Data Online	Country Options	
Sample Output: <u>ASCII Space Delimited</u> <u>Printable Web Form</u> <u>Hourly Summary</u> <u>Inventory</u> <u>Map Analysis</u>	United States Uruguay Uzbekistan Vanuatu Venezuela Vietnam Access Data/Products	
<u>Info / Help</u>		

When you select another country besides the United States, **look for datasets of DS3500 surface data monthly**. That dataset appears to be working as of January, 2007.

OK So back to getting the data from set TD3220 when it is working (which is most of the time) This is the data set you get when you select STATION NAME So I selected Fayetteville for station name, I want Fayetteville, AR (not NC...)

FAYETTEVILLE EXP STN , AR	Surface Data, Daily - 05/1890 to 11/2006
UNITED STATES	<u>DS3220 - Surface Data, Monthly</u> - 1891 to 2006
COOP-WBAN ID: 032444-99999	Surface Data, Annual Summary

So next I will select one of my data elements (MMNT), year, delimited no station name, and output with comma

Select Meteorological Element(s): (SEE NOTES BELOW)	Date Range (Year):
HTDD Monthly heating degree days - base 65 deg F. HXyz Highest maximum soil temp for the month (deg F) LNyz Lowest minimum soil temp for the month (deg F)	From 1986 To 2006 Through 12/2006
LOyz Lowest soil temp at observation time (deg F)	Select Output Format:
LXyz Lowest maximum soil temp for the month (deg F) MMNP Monthly mean minimum temp of evap pan water (deg F MMNT Monthly mean maximum temp of evap pan water (deg F MMXP Monthly mean maximum temp (deg F) MNTM Monthly mean temp (deg F)	Delimited - No Station Names Delimited - Station Names Select Output Format Delimiter: (only if Delimited format selected above)
	Comma Space
The *ALL* option will select all available data elements. Use the Shift or Control key with mouse click TO SELECT multiple element.	Output via FTP

Hit continue

You get the screen with a "check" of your data, then put a check mark in the box and put in your email address:

DS3220 - Surface Data, Monthly - US & some Non-US Cooperative, Request Summary

 Selected Stations - includes 1 stations (See selected stations below)

 Selected Meteorological Element(s):
 Date Range (Year):

 'MMNT'
 1986 to 2006

 Selected Output Format:
 Comma Delimited, without station name

 Selected Output Media:
 FTP

Total Data Rows Available: 18 - <u>View Inventory</u>

Output File Size (bytes): 5080

☑ Inventory Review: I have reviewed the <u>Inventory File</u> to see if the elements/dates desired are included *before* ordering. Some time periods or elements may be missing.

IMPORTANT! Please enter a valid email address below so we can notify you when your request has finished processing.

E-mail Address: alevel@

PAGES 4-5 show ONE way to get data, PAGES 6,7,8 show ANOTHER way. It is like saying 6 of one, a half-dozen of another....

If you selected COUNTRY Then you get this screen:

Select surface dat	a monthly	(again,	for the	US	exampl	le)

Climate Data Online	DataSet/Product Options
Sample Output: <u>ASCII Space Delimited</u> <u>Printable Web Form</u> <u>Hourly Summary</u> <u>Inventory</u> <u>Map Analysis</u>	Precipitation Data, Hourly (Over 6,100 U.S., some non-US sites) Surface Data, Daily (Over 19,000 U.S, some non-US sites) Surface Data, Hourly Global (Over 10,000 worldwide sites) Surface Data, Monthly (Over 18,000 U.S, some non-US sites) Surface Data, Monthly Global (Over 3,100 worldwide sites) Surface Data, Monthly Global (Over 300 worldwide sites; GCOS)
Info / Help:	Access Data/Products
Precipitation Data, 15 minute 🗾 go	

Notice we are now in the DS3220 datasets, not TS3220....

Select your state, I selected Arkansas

		Sort by Coop I
	Continue Clear Selections Pre	evious Page New Search

Hit continue

The next screen looks more confusing than it really is. You will look for your variables, MMXT (monthly mean maximum temperature), and the precipitation variables. You will need to request one variable at a time.

On this page, you will be selecting four things:

You will Select Meteorological Element: (highlight in blue one variable) Then select date range: make "from" at least 10 years back in time Select Output Format: delimited, no station name Select Output Format Delimiter: comma

Since you need a total of 4 data elements, you will be going back to this "select meteorological element" page 4 times, you will be a pro!

Select Meteorological Element(s): (SEE N	DTES BELOW) Date Range (Year):
HTDD Monthly heating degree days - base 65 d HXyz Highest maximum soil temp for the month LNyz Lowest minimum soil temp for the month LOyz Lowest soil temp at observation time (deg LXyz Lowest maximum soil temp for the month MMNP Monthly mean minimum temp of evap p MMNT Monthly mean minimum temp (deg F) MMXP Monthly mean maximum temp (deg F) MMXT Monthly mean temp (deg F) MNTM Monthly mean temp (deg F)	(deg F) To 2003 Through 08/2005 deg F) F) Select Output Format: (deg F) Delimited - No Station Names n water (deg F) Delimited - Station Names
The *ALL* option will select all available Use the Shift or Control key with mouse click TO SE	

Check the inventory review and put in your email address.

Selected Meteorological Element(s): 'MMXT'	Date Range (Year): 1993 to 2003
	Selected Output Format: Comma Delimited, without station name
	Selected Output Media: FTP
	Total Data Rows Available: 11 - <u>View Inventory</u>
	Output File Size (bytes): 3302

Then hit submit request.

Check page, you will then click on the line with the URL

NNDC CLIMATE DATA ONLINE

DS3220 - Surface Data, Monthly - US & some Non-US Cooperative, Request Verification

Your DS3220 - Surface Data, Monthly - US & some Non-US Cooperative request - CDO00840652 has been submitted for processing.

You will be notified by email at alevel@colostate.edu when processing has completed for your request.

NOTICE! Click on the following URL to access your files: http://wwwl.ncdc.noaa.gov/pub/orders/CDO959416763241.html

This is the next screen:

From the time you submitted your request it may be several minutes (to several hours for larger volumes) before your data, data inventory and station list files are available. For this reason it is recommended that you bookmark this web page for future reference and access to your files. You will also receive email notification when your data files are ready.

This web page and the data files / web forms listed below will be available for 7 days, after which they will be deleted from NCDC's web server.

File Contents	Access URL	File Size Estimate (bytes)
DS3220 - Surface Data, Monthly - US & some Non-US Cooperative - <mark>Data Fil</mark> e	http://www1.ncdc.noaa.gov/pub/orders/959416763241dat.txt	330
DS3220 - Surface Data, Monthly - US & some Non-US Cooperative - <mark>Inventory</mark>	http://www1.ncdc.noaa.gov/pub/orders/959416763241inv.txt	90
Station List	http://www1.ncdc.noaa.gov/pub/orders/959416763241stn.txt	50
DS3220 - Surface Data, Monthly - US & some Non-US Cooperative format documentation	http://cdo.ncdc.noaa.gov/cdo/3220doc.txt	Not available

You will want to look at the first and last links above. The first URL is for your data. The last link is for the documentation, it tells you things like whether the temperature data is F or C, and whether the precipitation data is in cm or inches. You will need to know this for the graph labels.

Example of the data in the first URL

Places	Save as type:	Text File (*.txt)] Ca	ncel
	Encoding:	Unicode (UTF-8)		-	
	Ericoung.	Junicode (UTF-6)		1	

This example saves to the desktop, file name Fayetteville

Then click on "save"

You have now saved your NCDC file as a text or .txt file.

The next step is to import the file into Excel, so you can clean up the columns and have the data in something that will be helpful.

Open up the Excel program on your computer (start, program, excel) You will need to go to the top left, file, open, and get to the folder or location where you save the file.

You will also need to change files of type from Microsoft excel files to all files.

OK,

I would then go up top left to file, save as and give it a file name and save as an excel file, not a text file.

Now you will want to clean up your data as needed. To do this you may have to compress columns or remove them, follow what your instructor tells you.

Remember, for the dates such as this:

JAN	F
	-
-99999	ľ
644	I
603	
588	

-99999 means an error and valid data was not collected for that month
644 is really 64.4 degrees F
588 is 58.8F
watch out, international temps may NOT be in F check your data guide.

OK, now go back to the NCDC site and get your other variables.

The NCDC site goes down off and on in early March. This has happened the past 2 years, so DON'T WAIT until the last minute to get your data from the site. If the site is down, you can't get your data. We don't have "extra copies" of data in the library. You must use the website.

For an international city, use your handouts from before, when you get to the screen where you can select at station, put in your international city. In this example I am using Santiago, Chile. I type in Santiago, and get several listings.

Select the monthly for 6-1991 to 12-2002.

Station	Dataset - POR
SANTIAGO, PANAMA ISH ID: 78795099999	<u>TD3505 - Surface Data, Hourly Global</u> - 01/2003 to 08/2003
SANTIAGO DAM, CA UNITED STATES COOP ID: 047987	<u>TD3240 - Precipitation Data, Hourly - US & some non-US</u> - 07/1948 to 06/2001 <u>TD3260 - Precipitation Data, 15 minute - US & some non-US</u> - 01/1984 to 05/200
SANTIAGO DE CUBA, CUBA ISH ID: 78264099999	TD3505 - Surface Data, Hourly Global - 01/2003 to 08/2003
SANTIAGO DEL ESTERO, ARGENTINA ISH ID: 87129099999	TD3505 - Surface Data, Hourly Global - 01/2003 to 08/2003
SANTIAGO DEL ESTERO, ARGENTINA WMO ID: 87129	<u>TD3500 - Surface Data, Monthly Global</u> - 01/1987 to 12/2002
SANTIAGO INTL ARPT, DOMINICAN REPUBLIC ISH ID: 78460099999	TD3505 - Surface Data, Hourly Global - 01/2003 to 08/2003
SANTIAGO PEAK, CA UNITED STATES COOP ID: 047993	<u>TD3240 - Precipitation Data, Hourly - US & some non-US</u> - 07/1971 to 09/2003 <u>TD3260 - Precipitation Data, 15 minute - US & some non-US</u> - 07/1971 to 09/200
SANTIAGO QUINTA NORM. CHILE WMO ID: 85577	AL, <u>TD3500 - Surface Data, Monthly Global</u> - 06/1991 to 12/2002

As of January, 2006 the TD3500 dataset is working online.

Then you get this screen, remember to change the dates in the Use date range:

Select Date Restrictions: • Use Date Range <= OR ====	O Use Selected Dates *
Year Month From 2001 • 12 • To 2002 • 12 •	Year Month 2002 ▲ 2001 2000 1999 1998 1997 1996 1995 ▼ 05 ▼ 10 12 ▲ 11 10 09 09 09 05 ▼ 1995 ▼ 10 10 10 10 10 10 10 1
Select Output Format: Delimited, without station name Select Output Format Delimiter: (only if Delimited format selected above) Comma Space	Output via: FTP

Then you get all the usual screens asking you for your email, etc. etc.

Text data for international cities include several columns of various data. Use the file that acts as the "legend" to find out what they mean. This file is the 4th file on your page that has data files. In this example, it is the file with the name 3500doc.txt at the end.

This web page and the data files / web forms listed below will be available for 7 days, after which they will be deleted from NCDC's web server.

File Contents	Access URL	File Size Estimate (bytes)
TD3500 - Surface Data, Monthly Global - <mark>Data File</mark>	http://www1.ncdc.noaa.gov/pub/orders/285159439696dat.txt	1437
TD3500 - Surface Data, Monthly Global - <mark>Inventory</mark>	http://www1.ncdc.noaa.gov/pub/orders/285159439696inv.txt	290
Station List	http://www1.ncdc.noaa.gov/pub/orders/285159439696stn.txt	549
TD3500 - Surface Data, Monthly Global format documentation	http://cdo.ncdc.noaa.gov/cdo/3500doc.txt	Not available

Your data file, the top file in this example includes several columns of data.

For example for international data: MTMP=mean temperature in C to the 1/10 so 214 is 21.4C TOTP=total precipitation in mm

Use your "legend" file to locate the description of the other variables.

For this example I used just one year of data, you will need more than one year.

NOTICE: The international data combines ALL data elements and can be confusing. TAKE YOUR TIME as you look through the data. Make sure you print out the legend file (document) that tells you the field number, the data element, and the measurement used (i.e. is temperature in F or C for international data??)

Other Library Resources You May Need:

How to find INTERNATIONAL CITY DATA

Locate an international city using the TIMES ATLAS OF THE WORLD (Plate 3). Copies of this atlas are located in the EIC, as well as in the Map/Atlas Collection on the First Floor, South.

Use the NCDC Website for precipitation data for your international city.

How to find SOIL SURVEY INFORMATION

You must use the print copies of the Soil Survey for your home county. These are located in the Documents collection (A57.38:) on the Fourth Floor, South Wing. Records for many of these soil surveys can be located in SAGE, but some older ones do not have records in SAGE. Most of the surveys are shelved alphabetically by County at the above call number. Surveys that were published before the 1960's are under different call numbers, so check SAGE or the list of Published Soil Surveys located at the Information Desk, if you do not find your county. Not all counties in the United States have been surveyed so you may not find yours - just use one from a close-by county.

Some of the Colorado Soil Surveys are available on the Web. The Colorado surveys have been cataloged in the CSU Library Catalog (Sage). You may search SAGE by keyword and put in soil survey then search location: web.

OTHER CLASSES are using soil surveys and checking them out of the library. DON'T wait until the last minute. Usually we have one copy of a survey, other copies are available from Prospector but you have to plan on 3-4 working days of travel time.
