USING CSU'S JOURNAL COLLECTION: FindIt@CSU

FindIt is your pathfinder to a number of services at the CSU Libraries:

- Link to the full-text of a journal article if CSU has a current subscription.
- Check whether CSU owns the journal or book.
- Automatically fill out the InterLibrary Loan form.

Two Ways to Use FindIt:

1. **Databases:** The FindIt button appears next to citations within many library databases. Clicking on the  button takes you to a menu that lists the options for that citation, including the full text of the article if CSU has a subscription.
2. **Journal Titles:** <<http://lib.colostate.edu/sfx/ejournals/>>
The Journal Titles form can be used to browse the Libraries' online journal collection, search for a specific journal title, or link directly to an article if a complete citation is available. To link directly to an article, provide the journal title or ISSN, date, volume, issue and start page. ISSN searching is the most accurate.

FindIt@CSU and Google Scholar

The FindIt button can be activated within Google Scholar to provide easy access to CSU's online subscriptions. Google searches across many disciplines and covers a wide variety of resources, including journal articles, theses, books, abstracts, and more. Although Google Scholar is aimed at the academic community, it uses a very broad definition of "scholarly literature." ***It is important to realize that not everything in Google Scholar is peer reviewed.***

Configuring Google Scholar to Display the FindIt@CSU Link

The FindIt link will automatically display for users accessing Google Scholar from on campus, but off-campus users will have to configure Google Scholar to display the link. See <<http://libguides.colostate.edu/googlescholar>> for instructions on configuring Google Scholar.
